WIRELESS OUTDOOR SENSOR

MAXIMIZE COMFORT

Adding an outdoor temperature sensor is a great way to improve the comfort and efficiency of a system ensuring the best heating method is used depending on the outside temperature. The wireless capability makes the installation a breeze and a no brainer for any heat pump retrofit.

Extended Wireless Range • UV Resistant Plastic • Attractive Discrete Design
Long Battery Life • Weather Resistant Case • Adjustable Dual Fuel Balance Point
Outdoor Temperature Displayed on the T755WHO

Part of the PROsync System (T755WHO required and sold separately)
